Objective

Data-driven AI and Analytics professional with hands-on experience in machine learning, NLP, and data visualization from internships at IBM and Shell. B.Tech CSE (AI & ML) with 8.61 CGPA and 9.04 SGPA. Seeking to apply analytical skills and AI expertise to deliver actionable insights and measurable impact in a challenging role.

Education

- B.Tech in Computer Science (AI & ML)** Dehradun, India Uttarakhand University CGPA: **8.61/10** (Expected: May 2027)
6th Semester SGPA: **9.04/10**

Internship Experience

- IBM AI & Cloud Intern** Jul – Aug 2025
 - Built a career-assistant chatbot on IBM WatsonX, reducing manual query handling by 40%.
 - Developed Python-based AI pipelines for real-time decision support, integrating NLP and cloud services.
- Shell Green Skills Intern** Jul – Aug 2025
 - Designed a Greenhouse Gas (GHG) emissions prediction model using pandas and scikit-learn on ESG datasets.
 - Delivered data analytics solutions for energy efficiency, creating dashboards and sustainability reports.
- Forage Virtual Job Simulations** 2024 – 2025
 - Completed industry-backed simulations: Data Analytics (Deloitte, Quantum), Data Visualization (Tata), Software Engineering (JP Morgan, Accenture).
 - Applied Python, SQL, and analytical thinking to solve real-world business problems with measurable outcomes.

Technical Projects

- Sentiment Analysis of Tweets** | Python, scikit-learn, TF-IDF, NLP
 - Trained a classifier on 1.6M tweets from Sentiment140 dataset, achieving 81.6% test accuracy.
 - Built and deployed EmotionLens – an interactive sentiment analyser: <https://emotion-lens-model.vercel.app/>
- Fake News Detection** | Python, NLP, TF-IDF, Logistic Regression
 - Developed a model on 20,000+ news articles, reaching 92% precision; validated with F1-score.
- GHG Emissions Prediction** | Python, pandas, scikit-learn, Regression
 - Analyzed 5 years of emissions data to forecast trends for ESG compliance; built visual dashboards.
- AI-Powered Career Assistant** | IBM WatsonX, Python, NLP
 - Created a conversational bot handling 100+ test queries; integrated NLP for intent-response mapping.
- Korean Grammar Coach (kgram_coach)** | Python, Google DeepMind Gemma 2B
 - Built a bilingual grammar correction tool for Korean & English using Gemma 2B LLM.
 - Applied prompt engineering techniques for language learning applications.

Technical Skills (Selected)

- Languages & Libraries:** Python (Pandas, NumPy, scikit-learn), SQL, C++
- AI/ML:** NLP, TF-IDF, Logistic Regression, Prompt Engineering, LangChain, RAG, LLMs
- Data & Visualization:** Data Visualization, Statistical Analysis, KPI Dashboards, ESG Reporting, Power BI
- Tools:** Git, GitHub, IBM Cloud, VS Code, Power BI, Ollama, Excel Automation, REST APIs

Achievements & Activities

- Google DeepMind Gemma 3n Impact Challenge** – Built an AI-powered language coach using Gemma 2B.
- MSME Idea Hackathon 5.0** – Submitted high-impact AI-based proposal under official themes for funding.
- ICASDGAI-2025** – Presented research paper on AI Governance and Policy at an international conference.

Certifications (Selected)

- IBM SkillsBuild (AI/Cloud, RAG with LangChain, Granite, Docling) | Google Cloud – GenAI Studio
- AWS – Solutions Architecture & CAF | Infosys (AI, NLP, Deep Learning, Data Science, CV, RPA, Time Mgmt)
- Forage (JP Morgan, Deloitte, Tata, Quantum, Accenture) – 8 Simulations
- NISM Financial Literacy | Simplilearn – Excel Automation | Learntube – Java
- ICASDGAI-2025 (Research Paper) | PCDS Infotech – Aptitude (A+ / 100%)
- IBM 4-Week Internship | Shell 4-Week Virtual Internship

Extra-Curricular & Interests

- International pen-pal communication (cross-cultural exchange, strengthening global perspective).
- Poetry writing (appreciation for structure, rhythm, and precision in language).
- Avid reader of science fiction and technology ethics.

Languages

- English (Fluent), Hindi (Fluent), Telugu (Native), Korean (Beginner – actively learning)
